

## Workshop Technician

### Job Description

#### Company Description

Kinesys is a fast growing and dynamic company working within the entertainment industry. We specialise in the design, manufacture and sale of motion control and stage automation systems and our products can be found in use at any number of high profile venues, theatres and installations as well as on many of today's biggest concert tours. We supply systems to companies and venues the world over and have a reputation for quality, design and service that is second to none.

Based in Hampton in South West London, Kinesys is a highly motivated organisation operating within a relaxed and friendly environment with the simple philosophy of delivering the best and most appropriate technologies to whatever project is presented.

#### The Position

Kinesys' requirement is for a Workshop Assembly Technician to manufacture and test products within Kinesys' product range.

#### Tasks

- Mechanical and electrical assembly of electrical control equipment
- Manufacture of cable assemblies
- Manufacture of basic printed circuit boards
- Wiring of electrical cabinets and associated back panels
- Test and calibrate various products by following and completing written test instruction sheets
- Work with other departments to highlight any errors that are found during testing and to help develop ideas to minimise errors in future
- Assist with the packing of all products ready for shipping
- Maintain a clean, tidy and safe workshop area

You will have the ability to adapt your role as the needs of the staff and company evolve, and enjoy working in a fun and often quite 'last minute' environment. You will need to have excellent attention to detail and be able to work with others to resolve any technical issues that may arise during the course of your work

+44 (0)20 8481 9850

Kinesys, Unit 2 Kempton Gate, Oldfield Road,  
Hampton, Middlesex, TW12 2AF, UK

### **Additional Skills and Experience**

- Experience with electrical assembly, wire termination, crimping, terminals
- Ability to follow detailed instructions and use common testing equipment including multimeters, earth impedance testers and RCD testers
- Experience with soldering, mainly through hole or connector terminals but also SMD
- Experience working with teams to diagnose technical issues during assembly and testing

### **Personal Skills**

- Excellent attention to detail during both one off and repetitive tasks
- Maintain high standards of workmanship without constant supervision
- Ability to work efficiently in order to meet tight deadlines
- Able to work on tasks individually but happy to work as a larger team

### **Remuneration**

Salary £17,000 - £21,000 dependent on skills and experience

Company Pension scheme including employer pension contribution
